

# **C-19 VACCINE INFO & ACCESS COUNTRY PROFILE INDONESIA**

Aditya Wardhana  
Executive Director – Indonesia AIDS Coalition

Online Regional Workshop on COVID-19 Vaccine Access in Asia

# INDONESIA

## TOTAL CASES

3,749,446 per 12 August 2021\*

## CURRENT CASE

- Spiked significantly since the beginning of July
- Decrease gradually in the last 10 days
- But instead, it went increased on outside of Java and Bali island or in remote islands and area

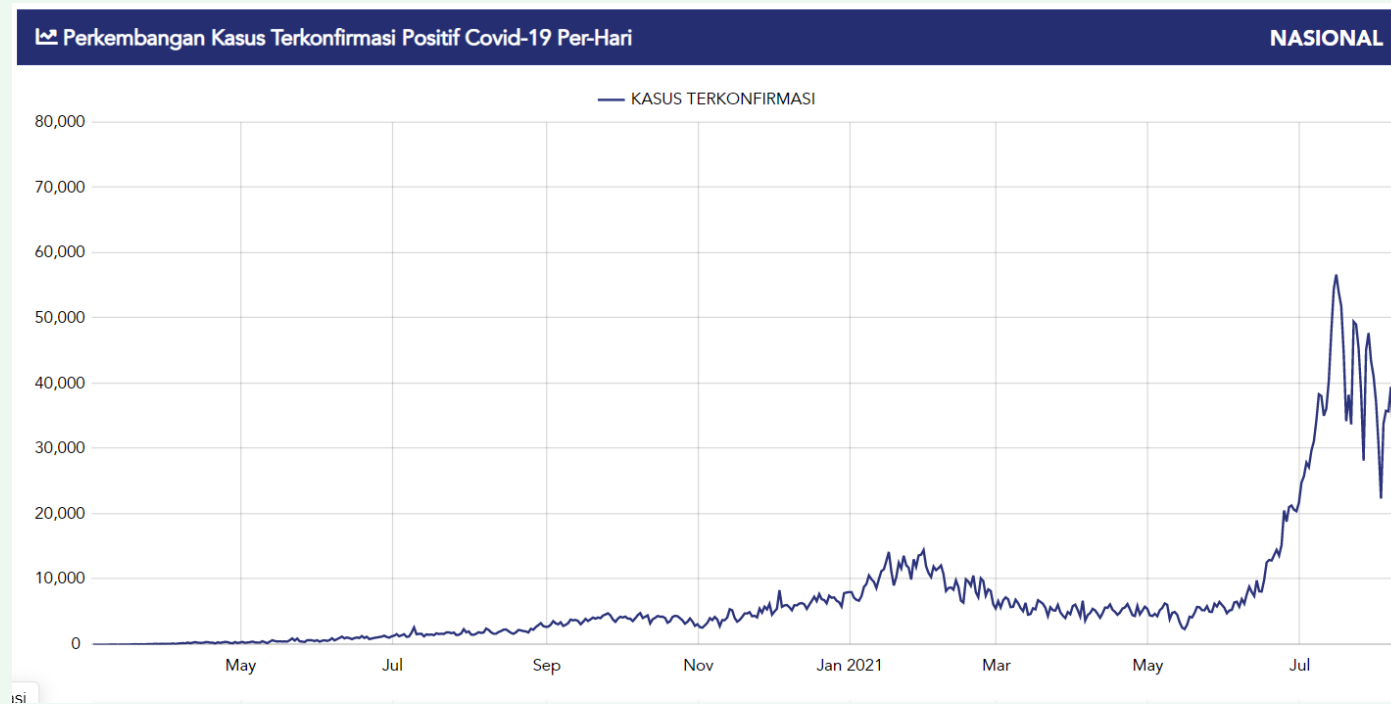

## KEY IMPACTS ON KAP

- Access to Health Services (health resources being redirected to C-19, KAP reluctant to visit services, etc)
- Economy (loss of income, unemployment, etc)
- Psychological impact (GBV/IPV increase, confinement, lack of social interaction, anxiety of the virus infection)

03

## LOCAL RESEARCH/ PRODUCED VACCINE

- Vaksin Merah Putih
- Research by 6 institutions
- Currently in approval and permit stage
- Target mass production and distribution by PT.Bio Farma in January 2022

# INDONESIA

1st Dose

24,58%

2nd Dose

11,96%

Total Indonesia Citizen: 271,349,889

## WHO IS BEING LEFT BEHIND?

- HIV still considered as co-morbid and are requires VL & CD4 test result
- Marginalized, those who do not have ID Card in particular

## ELIGIBILITY

All citizens above 12 years are eligible for vaccine including pregnant women, except for those with serious health conditions, allergy, blood pressure, etc.

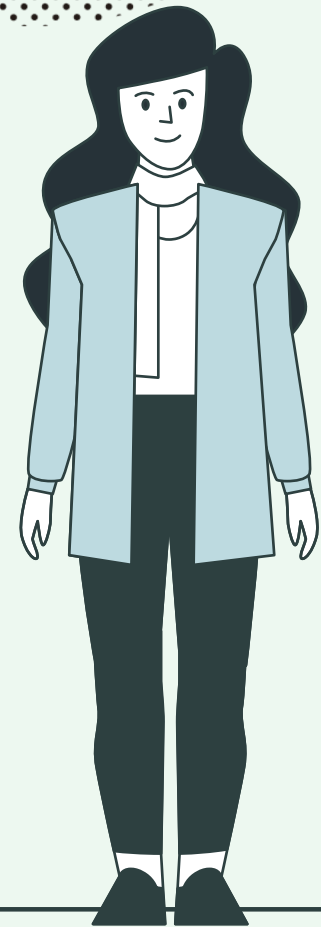

## KEY BARRIERS TO C-19 ACCESS FOR PLHIV & KAP

- ID card ownership
- Geographical with transportation issue
- Disbelief to vaccine efficacy and fear of side effect
- Worry for the co-morbid\*

\*Rapid Survey COVID-19 Vaccine PLHIV

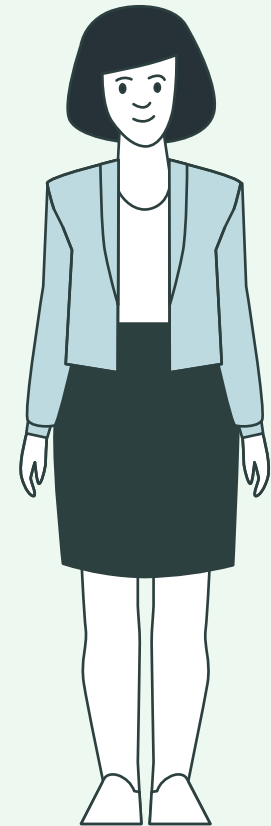

# ID Card Ownership vs Vaccination

Many of HIV KAP, Transwomen in particular, are struggling with the ID Card ownership which hinder their way to vaccine access and government social support.

# Distribution of Information

- Misguided by hoax and unreliable source of information, many believe on the ineffectiveness of vaccine, halal status, and even the fatal side effects.
  - Health service providers that are not yet updated with the most recent information
  - Updated regulation on the data and documents requirement for vaccination did not reach the rural areas

# IAC EFFORTS

- Advocacy by IAC together with SuaraKita to Home Ministry's Population and Civil Registration and resulted more than 80 Transwomen gets ID Card
- Assisting 32 Transwomen without ID Card to vaccination center
- Publishing campaign materials on website and social media containing the facts and information on COVID19, Vaccination, and its correlation with HIV. Further socialization are also planned
- Encourage and involve in the TRIPS Waiver Proposal
- Encourage vaccination centre expansion, particularly for KAP

# RECOMMENDATION

- Differentiated Vaccination Model (facility-based, static, mobile)
- Encourage local production for Vaccine (Indonesia needs mRNA Vaccine Technology)
- Friendlier registration process, including breaking ID card barriers
- Expand and scale up the widespread of information including updates on regulation and requirements
- Follow and monitor the progress of TRIPS Waiver
- Strengthen and expand campaign on Vaccine, collaboration with influencers, religious leaders, public leaders, etc.
- Indonesia starts rolling out booster vaccine for health workers

# MANY THANKS!
